Navy Medicine: Being There Matters

70%
OF THE WORLD IS COVERED BY WATER.

Who We Are

$6 Billion global network

63,000 people worldwide

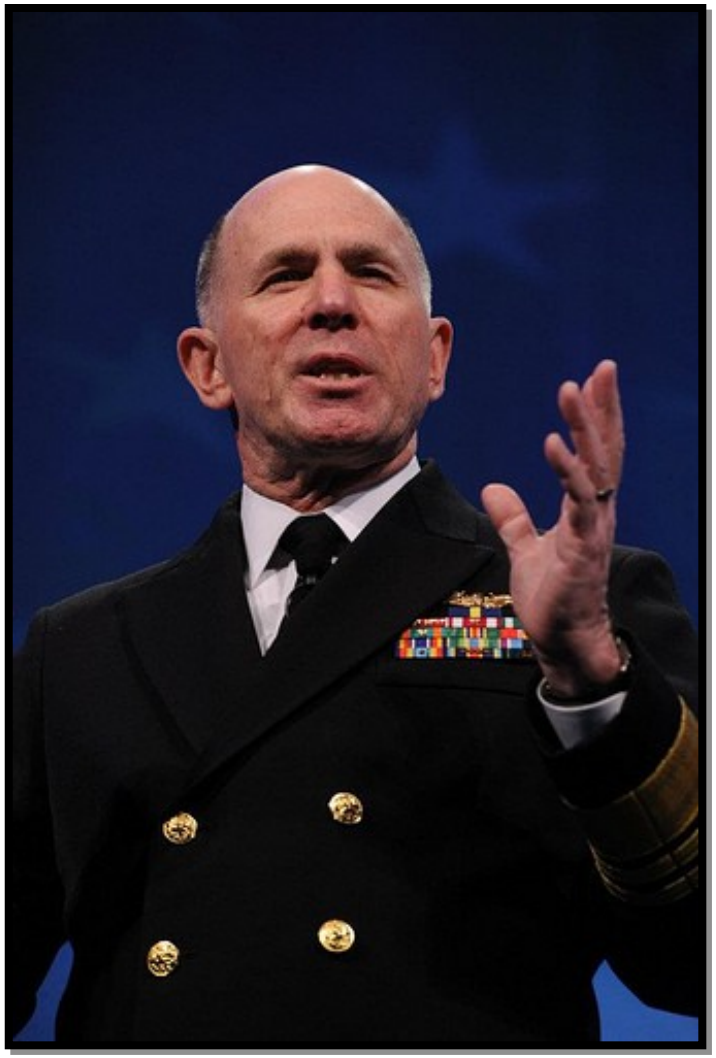
Navy, Marine Corps, families and veterans

Expeditionary care on, above, below the sea and on battlefields worldwide

Cornerstone of Smart Power

Global engagement

U.S. NAVY PRESENTS



"Our job in Navy Medicine is to support the forward deployed force and provide readiness. Moving forward, we must continue to connect our heroes to approved emerging and advanced diagnostic and therapeutic options both within our medical treatment facilities and outside of military medicine through collaborations with major centers of reconstructive and regenerative medicine."

- Vice Adm. Matthew L. Nathan

U. S. Navy Surgeon General

Enabling the Warfighter

Supporting the U.S. Navy and Marine Corps

How We Support

Navy Medicine provides support to the Chief of Naval Operations and the Commandant of the U.S. Marine Corps by enabling readiness, wellness, and health care to Sailors, Marines, their families, and others entrusted to the care of Navy Medicine worldwide.

CNO's Tenets:

- **Warfighting First**
- **Operate Forward**
- **Be Ready**

- **Support to the warfighter** – Navy Medicine is everywhere our Sailors and Marines are. No ship leaves the pier and no Marine takes a hill without his corpsmen in sight.

- **Readiness** – Navy Medicine is in the readiness business. Mission readiness for our Sailors and Marines at home and abroad is our first priority.

Expeditionary Medicine

Navy Medicine provides expeditionary health care on, above, under the water and on battlefields worldwide.

Garrison Health Care

Navy Medicine supports medical readiness, providing health care to the warfighter and their families worldwide.

Wounded Warrior Care

Navy Medicine provides health care to our wounded warriors and their families.
